Plan of Safe Care

Did you know it is a state and federal law to provide a Plan of Safe Care (POSC) to your perinatal patients who are substance-exposed?

According to the State of New Hampshire Department of Health and Human Services, medical providers are responsible for developing the POSC with their patients. It must be put into place prior to discharge after birth.

- **The letter from July 15, 2019 can be found at this link:**
http://1viuw040k2mx3a7mwz1lwva5-wpengine.netdna-ssl.com/wp-content/uploads/2019/08/FINAL_POSC_ProviderLetter_7-15-19.pdf

NH Healthy Families is ready to assist you with developing a POSC for NH Healthy Families members by:

- Providing you an overview of the law, helping you plan and providing resources
- Helping patients who are NH Healthy Families members develop the POSC
- Fostering coordination of Medicaid services and supports to help families
- Educating members on *Start Smart for Baby*® care management and reward program for mother and baby
- Educating members about *Ready for My Recovery* program

Please contact me to learn more about POSC.
