

# Initiation and Engagement of Substance Use Disorder Treatment (IET) Provider Tip Sheet

## Why is the IET Measure Important?

Many people living with a physical health condition also have co-occurring mental and substance use related disorders and may not realize it or are not seeking help. Together with early detection and a whole person, integrated treatment approach we can help our members stop or reduce harmful substance misuse, improve health outcomes and overall quality of life.

## What is the IET Measure Looking At?

This measure assesses the percentage of members ages 13 and older with a new episode of substance use disorder (SUD) who received the following:

1. **Initiation of SUD Treatment** - The percentage of members who initiate treatment through an inpatient SUD admission, outpatient visit, intensive outpatient encounter or partial hospitalization, telehealth, or medication treatment within 14 days of the diagnosis.
2. **Engagement of SUD Treatment** - The percentage of members who initiated treatment and who were engaged in ongoing SUD treatment within 34 days of the initiation visit.

## What Can You Do to Help?

- Provide empathic listening and nonjudgmental discussions to engage the patient and caregivers in decision making and a relapse prevention plan.
- Offer virtual, telehealth and phone visits when appropriate.
- Use evidence-based screening and treatment as recommended by SAMHSA.
- Consider Medication Assisted Treatment (MAT) options for patients with alcohol or opioid use disorder and maintain appointment availability.
- Offer mutual help options like case management, peer recovery support, harm reduction, 12-step fellowships (AA, NA, etc.), or other community support groups.
- Reach out proactively within 24 hours if scheduled appointment is not kept to schedule another.
- Provide integrated/coordinated care between the physical and behavioral health providers to address any comorbidity.
- Reinforce the treatment plan and evaluate any medication regimen considering presence/absence of side effects etc.
- Partner with the health plan to address social determinants, health equity, and quality care.
- Provide timely submission of claims and code substance related diagnosis and visits correctly.

## How is IET Adherence/Compliance Met?

- Initiation of SUD treatment is met when the member initiates treatment for SUD through an IP SUD admission, outpatient visit, intensive outpatient encounter, partial hospitalization, telehealth visit or medication treatment event within 14-days of the SUD episode.
- Engagement is met when the member has (any combination of) two SUD visits or medication treatment events on the day after the initiation encounter through 34 days after.
  - Two visits can occur on the same day if by different providers.
  - A visit and a medication event can occur on the same day by the same provider.
