Connor's Climb Foundation Webinar September 21, 2021

As a provider of primary care services, you are in a unique position to prevent suicides among your patients, particularly youth and adolescents. Research tells us that people who die by suicide are more likely to have seen their primary care provider shortly before their death than any other health care professional.

Suicide is the second leading cause of death for young people between the ages of 10 and 24. There is good news, though: suicide is preventable. The best way to prevent suicide is to use a comprehensive approach (<https://www.sprc.org/effective-prevention/comprehensive-approach>) that includes training all staff in evidenced-based suicide care practices and protocols.

NH Healthy Families and Connor's Climb Foundation have partnered to provide training on the evidenced-based Signs of Suicide (SOS) prevention program. **This 1 hour, on-line training will be offered to providers at no cost September 21, 2021 beginning at 12:00 pm.**

NH Healthy Families shares in Connor's Climb goal to ensure that the youth of New Hampshire do not reach the point of crisis. We are grateful to have you as our partners in this important work.
