

## Important Billing Update for Home Health Providers Effective July 15, 2026

May 15, 2026

NH Healthy Families is sharing an important billing update for home health services. **Effective July 15, 2026**, the following **modifiers will be required** when billing the CPT codes. All PT/OT/ST services must include the corresponding modifiers, ensuring compliance with the updated requirements

### What's Changing

For dates of service **on or after July 15, 2026**, providers must bill:

- **GP, GN, or GO modifiers**

### Why This Matters

Claims submitted **without the required modifier(s)** may result in:

- Claim delays
- Claim denials

Adding the correct modifier helps ensure accurate processing and timely payment.

### What Providers Should Do Now

- Review your billing processes
- Ensure staff and billing vendors are aware of this change
- Begin using the required modifiers for services provided on or after July 15, 2026

Thank you for your continued partnership and for the care you provide for our members.

Sincerely,  
NH Healthy Families
